Our Spring 2024 U5-U7 ID Clinics are great for current recreation level players born between 2019 and 2017 who are interested in being evaluated for travel soccer. Training in our ID clinics resembles that of a travel team training. Players are put through a number of activities and exercises that focus on the technical and tactical side of the game. It also allows the players to engage in games and competitions where they can put their skills to the test.
